Student Transportation - Alternate Seat Service Option

On June 12, NGPS invited parents and guardians to participate in a transportation survey to gauge how many parents and guardians want and/or need alternate service, knowing that additional fees would be charged. Parents and guardians were invited to participate in the survey via email. Links to the survey were also shared on the Division's Facebook page, Twitter feed, website and school websites.

Highlights:

- Survey was successfully delivered to 3,188 NGPS parents/guardians
- There were a total of 454 respondents (14% response rate)
- Of the 454 responses, 300 (66.2%) said No they would not be in favour of a fee-based alternate seat service option
- Of the 454 responses, 154 (33.8%) said Yes they would be in favour of a feebased alternate seat service option

NGPS Director of Transportation Rhett Czaban spoke to the challenges an alternate seat service option would pose: "The complexity of adding services has the potential to negatively impact our current system, increase ride times for students and increase logistical challenges such as parental communication, site changes, fluctuating seat availability and school based supervision."

Following discussion, a Motion was made in support of an alternate seat service option; however, this Motion was defeated. The matter was than referred to the Board Policy Committee for further study.
